

Business Requirements Document (BRD)

Application Name: Maverick Talent Insights

Training Performance & Competency Tracking System (Mavericks Dashboard)

1. Introduction

1.1 Purpose of the Document

The purpose of this Business Requirements Document (BRD) is to define the **functional, non-functional, and reporting requirements** for the **Maverick Talent Insights** platform.

Maverick Talent Insights is a centralized **Training Performance & Competency Tracking System** designed to provide complete visibility into the **trainee lifecycle**, from onboarding through training, assessment, competency development, and readiness for deployment.

The system aims to replace fragmented, manual tracking mechanisms with an **automated, data-driven dashboard** that enables stakeholders to monitor progress, identify talent, and make informed decisions efficiently.

1.2 Business Need

Current trainee tracking processes are heavily dependent on manual spreadsheets and disconnected data sources, leading to:

- Limited real-time visibility into trainee progress
- Inconsistent assessment tracking
- Difficulty identifying top and low performers
- High administrative effort and risk of data errors
- Delayed insights for business and HR leadership

Maverick Talent Insights addresses these challenges by providing a **single source of truth** for training performance and competency tracking.

2. System Overview

Maverick Talent Insights will manage and centralize:

- Candidate onboarding and demographic data

- Training stage progression across multiple programs
- Assessment scores, attempts, and performance trends
- Competency acquisition and readiness indicators
- Batch-wise, stream-wise, and location-based analytics

The platform will deliver **real-time dashboards, automated calculations, and structured reporting** to improve training effectiveness and workforce readiness.

3. Business Objectives

The primary objectives of Maverick Talent Insights are to:

- Track the complete trainee lifecycle from onboarding to deployment readiness
 - Monitor and manage training stages:
 - Spark
 - Foundation
 - Coding
 - Project
 - Competency Training
 - Capture and analyze assessment scores with attempt-level granularity
 - Identify top performers (“Toppers”) across stages, streams, and batches
 - Measure and track competency development over time
 - Enable data-driven decisions for L&D, HR, and Business leadership
 - Reduce manual tracking and consolidation effort by **80% or more**
 - Provide role-based, real-time dashboards for all stakeholders
-

4. Scope

4.1 In Scope

The following capabilities are included within the scope of this phase:

- Bulk trainee data upload via standardized Excel templates
- Training stage progression tracking

- Multi-level assessment score and attempt tracking
- Competency tracking and status management
- Automated topper identification logic
- Batch-wise, stream-wise, and stage-wise analysis
- Location and demographic analysis
- Dashboards and structured reports
- Data export in Excel and PDF formats
- Role-based access control

4.2 Out of Scope

The following are explicitly excluded from the current scope:

- Learning content delivery
- Learning Management System (LMS) integration
- Payroll processing or HRMS integration
- Live coding platform integration
- Real-time assessment execution

5. Stakeholders

Stakeholder Role	Responsibility
Training Coordinator	Upload trainee data, update training stages, track progress and assessments
Trainers	Review trainee performance and progression
HR Team	Analyze training outcomes and generate insights
Business Head	Review dashboards and assess overall training effectiveness
IT Administrator	Manage configuration, security, access control, and system maintenance

6. User Roles & Access Control

6.1 Training Coordinator

- Upload bulk trainee data
 - Update training stages and status
 - Track assessment scores and attempts
 - View batch-level and individual performance
 - Generate standard reports
-

6.2 Manager / Business Stakeholder

- View trainee performance and competency metrics
 - Identify high performers and low performers
 - Analyze batch, stream, and location-wise trends
-

6.3 System Administrator

- Manage user roles and permissions
 - Configure system parameters
 - Maintain audit logs and data integrity
 - Monitor uploads and system usage
-

7. Functional Requirements

7.1 Trainee Data Upload

The system shall allow **bulk upload of trainee data via Excel** with validation and error handling.

Mandatory Data Fields

Basic Information

- Date of Joining (DOJ)
- Superset ID

- Employee ID (Unique)
- Full Name
- Gender
- Email ID
- Phone Number
- College Name
- College Location (City/State)

Training Information

- Training Status
 - Stream (e.g., Java, Data, QA, Cloud)
 - Current Training Stage
 - Category
 - Assigned Competency
-

7.2 Training Stage Tracking

The system shall track trainee progress across defined training stages:

- Spark
- Foundation
- Coding Test
- Project
- Competency Training

Each stage will maintain:

- Status (Completed / Pending / Not Applicable)
 - Scores (where applicable)
 - Number of attempts
 - Completion date
-

7.3 Assessment Tracking

The system shall support granular assessment tracking across multiple programs:

Spark Program

- Phase 1 – Attempt 1
- Phase 1 – Attempt 2
- Final Score

Foundation Modules

- FM1, FM2, FM3
- Multiple attempts (FM1-1, FM1-2, etc.)

Technical Skills

- SQL
- Java / Python

Project Assessments

- Project score
- Mentor evaluation (if applicable)

Soft Skills & Other Assessments

- SA1 – SA6
- SP1, SP2
- Coding Tests (CT1 – CT7)

7.4 Performance Calculation

The system shall:

- Aggregate scores automatically
- Track improvement across attempts
- Identify performance trends
- Flag low performers based on configurable thresholds

7.5 Topper Identification

Automated logic shall identify and flag:

- Spark Toppers
- Foundation Toppers
- Stream-wise Toppers
- Batch-wise Toppers
- Competency-wise Toppers

Topper logic will be configurable and auditable.

7.6 Competency Tracking

The system shall track:

- Competency type
 - Training completion status
 - Skill progression level
 - Competency readiness indicators
-

7.7 Location & Demographic Tracking

The system shall store and report on:

- Base location
 - Current training location
 - College city and state
 - Batch and demographic distribution
-

7.8 Reporting & Dashboards

The system shall generate the following reports:

- Batch Performance Report
- Individual Trainee Performance Report
- Stage-wise Progress Report
- Topper Analysis Report
- Competency Readiness Report

- Assessment Score Trend Analysis
-

7.9 Data Export

Reports and datasets can be exported in:

- Excel (.xlsx)
 - PDF
-

8. Key Data Fields (Summary)

- Employee ID
 - Trainee Name
 - Training Stage
 - Stream
 - Assessment Scores
 - Assessment Attempts
 - Competency
 - Topper Flags
 - Performance Classification
 - Location Details
-

9. Automation Logic

The system shall support:

- Automatic score aggregation
- Automated topper identification
- Automated performance classification:
 - High Performer
 - Average Performer
 - Low Performer

Classification rules shall be configurable by Admin.

10. Non-Functional Requirements

10.1 Security

- Role-Based Access Control (RBAC)
- Secure file uploads
- Data encryption at rest and in transit

10.2 Performance

- Support minimum 10,000+ trainee records
- Report generation time ≤ 10 seconds

10.3 Availability

- System uptime of 99%
- Scheduled maintenance with alerts

10.4 Audit & Logging

- Track all data uploads and modifications
- Maintain upload history and versioning
- User activity logging

11. Assumptions

- Excel input templates remain standardized
- Users upload valid and verified data
- Stable internet connectivity is available

12. Risks & Mitigation

Risk	Mitigation
------	------------

Invalid data uploads	Field-level validation rules
Missing scores	Default handling and alerts
Duplicate records	Unique ID enforcement
Incorrect performance classification	Admin override capability

13. Success Criteria

- 100% trainee lifecycle visibility
- Accurate score aggregation and topper identification
- Real-time dashboards for stakeholders
- Reduction of manual tracking effort by $\geq 80\%$

14. Acceptance Criteria

- Bulk Excel upload completes successfully
- All mandatory fields are correctly mapped
- Score calculations are accurate
- Reports generate correctly in Excel and PDF
- Role-based access works as defined

Outcome

Maverick Talent Insights will function as a **centralized, scalable, and reliable talent analytics platform**, enabling structured training governance, transparent performance tracking, and actionable insights across the organization.
